COURSE DESCRIPTION (EN/L1 [if taught in L1])

Content

This course aimed to equip students with essential skills for scientific research writing, focusing on core principles such as understanding the nature of science, learning scientific work techniques, conducting topic research, and correctly citing sources. Students will develop the ability to formulate independent research questions and engage in ethical research practices. These insights and skills will not only enhance their academic performance but also develop mindset as educators promoting a culture of critical thinking, rigor, and integrity in educational institutions.

Competences & Learning Objectives

This course aimed to equip students with essential skills for scientific research writing, focusing on core principles such as understanding the nature of science, learning scientific work techniques, conducting topic research, and correctly citing sources.
