EUPeace – A TOPIC FOR ALL ACADEMIC FIELDS

CONFLICT AND CHANGE

Mobilising our entire community

- **Conflict** is a catalyst for change whilst **Change** in turn increases the likelihood of both useful and destructive conflict.
- We currently face manifold challenges and large-scale societal transitions such as the energy or the digital transition. Any of these processes can improve well-being and prosperity or create destructive tensions.
- With EUPeace, our communities of *all academic fields*, in particular STEM, are called upon to study the implications of the change processes they are participating in in terms of Peace, Justice, and Inclusion.
